The ClassBuddy™ Laptop 15

More Detail

The ClassBuddy™’s ultra-safe power management provides safe simultaneous charging of all devices with quick and easy access. The power management system incorporates three key areas of protection; soft-start, surge, and residual voltage, these provide the highest level of protection for the user, your equipment and electrical circuits.

Each trolley is naturally ventilated, allowing air to flow through ventilation holes in the base and shelves, and out through the top rear apertures. When using the data transfer option a temperature controlled fan is added to ensure optimum charging temperature.

Recessed handles give the ClassBuddy™ a smooth exterior and manoeuvrability is achieved with high quality castors which give 360° movement. Two castors are braked for stability and locking into position.

Security is provided through the cabinet’s construction, piano style hinges and locking mechanisms. There is a rear service door with unique keys for technical staff access only.

Standard
Black & Blue

Special
