

Wire Mesh Locker Spec Sheet

This range of bright zinc plated lockers is ideal for most applications and offers excellent ventilation and high visual security.

- Manufactured From 25x25x2.5 welded mesh on 8mm rod frame
- Each locker is fitted with floor fixing brackets with provision to be fitted back to back, to the wall and to the floor (fixings not included)
- All lockers have 3 point locking system or are fitted with hasp and staple (padlock not included)
- All lockers are fitted with 150mm legs as standard
- Electroplated zinc finish
- Power coated finish in all primary colours
- Sloping top lockers are appropriate to most changing areas, sloping top lockers are essential for hygiene sensitive areas, particularly hospitals and the food industry. They provide increased safety and tidiness by eliminating the possibility of litter and other items being stored on the top of the locker
- Lockers can be manufactured with or without doors
- Single tier lockers come complete with hat shelf and coat hook
- Two tier lockers come complete with coat hook or rail
- Compartment sizes differ depending on number of compartments/doors in locker
- Supplied individually or in nests of two, three or four which means they share common side panels, giving added price advantage, easier installation and maximum space utilisation.
- Available in 6 door configurations with a choice of three depths: 305mm,381mm and 450mm
- We also manufacture multi compartment lockers which are excellent for space-saving; they have been designed to store personal items, available with or without doors.
- We also provide non-standard sizes to your specification on request.
